SUMMARY

Front-End Web Developer with 1.5 years industry experience and formal web development training at UPenn Coding Bootcamp and NYCDA Bootcamp. Also have a graphic design BFA from the University of the Arts. Leverage code and design experience to communicate complex visual ideas across disciplines and teams. Timely and efficient solutions to user interface problems come from technical knowledge of back end systems.

TECHNICAL SKILLS

Development: HTML5, CSS, SaSS, Javascript and ES2015, jQuery, Bootstrap, Firebase, Git, WordPress.
Graphics: Photoshop, Sketch, Illustrator, In Design.
Project and Team Building: JIRA, Workfront, Agile environment
Corporate: IBM Management Center for Websphere, Monetate test production, Cornerstone (SVN)

PROJECTS

SAKI Study
A web application to help students streamline the process of organizing study meet-ups. After filling out a form, a map and student details are returned. Upon choosing a fellow classmate to meet with, a new map will populate with suggestions for mutually useful study spots. This group project utilizes Bootstrap, custom CSS and Javascript/ jQuery for the front end. TomTom API, Yelp API, Geocodio, Moment.js, AJAX/JSON and Firebase for the back end.

Sea Animal See
Find animated gifs of your favorite undersea creatures. Press an existing button or create a new one for more animal options. Created custom Javascript event listeners for button clicks and gif animation. Uses Giphy API for JSON calls.

Weather Window
Use stock photography to enhance weather app's connection to nature. Showcase Javascript, jQuery and JSON skills. Weather conditions are provided by Accuweather API.

Quoting Women on the Supreme Court
Responsive Web Design using Google Fonts and Photoshop layouts. Implement design using Sass and jQuery.

WORK AND VOLUNTEER EXPERIENCE

Code for Philly, Civic Engagement Launchpad 2018, Match-Match Philly. Group Project.
Provide UI advice and front-end coding in Bootstrap and Javascript for project to "integrate the City of Philadelphia's engagement data collection system (VAN) with its volunteer recruitment tool (Volunteer Match)". Launchpad demonstration 4/20/18.

Girl Develop It, Teaching Assistant Volunteer, Fall 2017.

Associate Front-End Web Developer, David's Bridal Corporate, Conshohocken, PA, 1/2016 to 1/2017.
Develop responsive content pages, using HTML and CSS to UX design created by Happy Cog and David's Bridal Creative Department. Code and up; load IBM e-Marketing spot banners using IBM Management Center for Websphere Commerce. Address PDP and PLP development requests by devising code for Monetate tests production. Prepare and code emails for Exact Target Deployment. Track work requests through JIRA and Workfront. Communicate project progress and reviews in Agile environment.

Code for Philly, Susty Hackathon, October 2015.
Resource Awareness Philly, project for homeless services. Image research, site logo using Illustrator.

Graphic Designer, Van Sickle & Rolleri, Medford, NJ, October 2001 to March 2003.
Develop museum and environmental design projects as the graphic design component part of a larger team. Use coding skills to launch a web version of the the company's promotional materials. *Left position due to now resolved medical issues.*
